29.....	4	5	.....	44
30.....	2	1	.....	45
31.....	2	12	.....	35
Total.....	92	105	17	.....
Daily average.....	3	.....	.....	45

Proportion of deaths to new cases received during the month of May, 18.5 per cent.  
NOTE.—See Public Health Reports, May 24, 1907, page 691.

## NICARAGUA.

*Report from Bluefields, fruit port.*

Acting Assistant Surgeon Layton reports as follows:

Week ended June 11, 1907. Present officially estimated population, 2,800; general sanitary condition of this port and the surrounding country during the week, bad.

No bills of health issued.

*Malarial fever at Cukra banana plantation.*

June 11 I visited the Cukra banana district and found malarial fever very prevalent there. The cases are mostly of the regular intermittent forms, while many are of the remittent type.

The banana plantations are laid out on the sides and summits of the hills. The laboring camps and houses of employees are near the foot of the main or Cukra hill. The surrounding regions are low,
